Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 7 and 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Petricca (6,499,595). Petricca discloses, in figs. 1, and 12, a container comprising a flange having a substantially circular peripheral edge generally parallel to but radially offset by an offset distance (see fig. 1 of the attachment), a flexible membrane lid sealed to the outer surface of the flange by a seal having a portion reduced width located at a pull-tab portion 25 of the membrane lid. The membrane lid comprising a substrate and a layer of sealant (see fig. 12).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koyama (5,231,227) in view of Gailus (4,890,758).

Koyama teaches a container having container body 1, a annular flange 5 having a constant width, and a flexible membrane lid sealed to an outer surface of the flange and having a pull-tab.

Koyama does not disclose the seal having a reduced-width portion at the pull-tab.

Gailus teaches, in fig. 9, a seal between a container flange and a lid having a reduced-width portion at a pull-tab.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention of Koyama with the seal having a reduced-width portion at the pull-tab, as taught by Gailus, in order to facilitate easily to peel off the lid from the container.

5. Claims 1-3, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matuszak (5,069,355) in view of Petricca (6,499,595).

Matuszak discloses a container having a flange projecting radially inwardly from the sidewall, a flexible membrane lid sealed to an outer surface of the flange.

Matuszak does not disclose the flange having a varying width.

Petricca teach a container comprising a flange having a varying width.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention of Matuszak with the flange having a varying width, in the view teaching of Petricca, in order to facilitate the opening of the container.

Response to Arguments

6. Applicant's arguments with respect to claims 1-4, 7-14 and 23-25 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
